

Yoga Sundaram RamaSwamy

GTM Engineer

Yoga.Sundaram@outlook.com | [LinkedIn](#) | (216) 200-2712 | [GitHub](#) | [Portfolio](#) | OH, USA

GTM Engineer with 6+ years of experience building revenue systems, automation workflows, and analytics infrastructure across SaaS and enterprise environments. Experienced in designing outbound orchestration, lead enrichment, funnel analytics, and AI-powered workflows using Python, Snowflake, dbt, Salesforce, Clay, and modern GTM tooling. Delivered systems that improved campaign engagement by 28%, increased free-to-paid conversion by 31%, and reduced manual operational effort by 45%. **Microsoft Certified: DP-700 Fabric Data Engineer Associate.**

PROFESSIONAL EXPERIENCE

GTM Engineer | Stripe

Jan 2026 - Present

- Built AI-assisted lead enrichment and outbound orchestration workflows across Clay and 6sense, helping expand marketing-qualified pipeline while improving overall GTM efficiency.
- Developed LLM-based personalization and competitive-intelligence workflows using LangGraph and RAG techniques, improving outbound conversion rates by 28%.
- Integrated Salesforce, Segment, Webflow, and Snowflake through n8n and custom APIs to create a unified revenue data layer supporting CAC, LTV, and funnel analytics.
- Created funnel analytics models in Snowflake and dbt to track lead-to-close velocity, win-rate drivers, and pipeline leakage, improving forecast accuracy across sales operations.
- Architected account scoring and GTM research workflows using Apollo.io, HubSpot, and LLM-based enrichment, reducing manual territory planning effort by 45%.
- Implemented observability and QA checks using LangSmith, webhook logging, and warehouse validation to improve workflow reliability and reduce sync failures.

Sales Operations Data Analyst Co-Op | Bendix

Jan 2025 – Dec 2025

- Operationalized triggered sales pipeline and revenue analytics solutions using T-SQL, SSIS, and Informatica, integrating CRM, pricing, and order datasets into centralized reporting systems that reduced manual effort by 35%.
- Configured QlikView dashboards tracking revenue performance, pipeline health, and regional conversion metrics, enabling sales leadership to identify funnel bottlenecks and improve forecast accuracy by 20%.
- Implemented data validation and deployment governance frameworks using Great Expectations, Zapier, and Git across ETL and reporting systems, reducing reporting data quality issues by 25%.
- Devised GTM workflow automations and lead-routing systems using Marketo and Gong, improving sales engagement visibility and accelerating follow-up efficiency across regional sales teams.
- Performed win or loss and pipeline velocity analysis on large transactional datasets, integrating CRM and marketing data into Snowflake to improve visibility into funnel conversion trends and deal progression.

Machine Learning Data Analyst | Amazon Development Centre

Nov 2019 – Mar 2023

- Conducted funnel, retention, and customer behavior analyses using SQL, Amazon Redshift, and SAP HANA, identifying growth and engagement drivers that contributed to a 20% increase in customer satisfaction and a 15% lift in retention.
- Produced and optimized scalable data pipelines using Python, PySpark, AWS Glue, and S3 to improve data reliability for ML and operational analytics workflows, reducing dataset inconsistencies by 32%.
- Delivered real-time KPI and operational dashboards in Amazon QuickSight, enabling stakeholders to monitor customer engagement, data quality, and business performance metrics with 45% faster anomaly detection.
- Centralized recurring reporting and operational workflows using VBA, Power Automate, and Apache Airflow, improving process efficiency, SLA adherence, and cross-functional visibility across business operations.
- Partnered with ML, product, and operations teams to standardize experimentation metrics, reporting definitions, and forecasting insights, supporting data-driven business and growth decisions.
- Maintained high-quality labeled datasets and operational governance standards using JIRA-based workflows, sustaining 99.8% data accuracy across large-scale annotation and analytics programs.

Data Analyst | Gharib Shipping Services LLC

Jul 2017 – Oct 2019

- Scaled Tableau dashboards integrated with Salesforce and MySQL to track revenue, customer acquisition, shipment performance, and retention metrics, reducing reporting turnaround time by 35%.
- Assembled scalable analytics workflows using Fivetran, BigQuery, dbt, and GitHub, enabling centralized reporting infrastructure and improving reliability of operational and customer performance reporting.
- Formulated forecasting and operational analytics models in Python to optimize shipment planning, fleet utilization, and inventory allocation, improving operational efficiency and reducing stock imbalances by 18%.
- Performed customer segmentation, retention, and lifetime value analysis using SPSS and SQL, identifying high-value client cohorts that contributed to a 12% increase in repeat business.
- Facilitated recurring financial and operational reporting processes using Excel VBA, reducing manual effort by 40% and improving reporting accuracy across reconciliation and billing workflows.
- Conducted pricing and customer behavior analysis to uncover cross-service purchase trends and churn drivers, supporting revenue optimization and customer retention initiatives.

PROJECTS

1. Intelligent Lead Scoring & Enrollment Prediction Engine for EdTech Platforms

- Deployed a real-time lead scoring pipeline that ingested multi-touch attribution data across 15+ channels to predict enrollment likelihood, achieving a 38% improvement in MQL-to-SQL conversion rate.
- Directed an autonomous nurture orchestration system that dynamically segmented 120K+ prospective learners using behavioral clustering and triggered personalized outreach sequences, driving a 4.5x increase in engagement rate.

Tech Stack: Python, Scikit-learn, Apache Kafka, Snowflake, dbt, HubSpot API, Segment, Looker, Airflow.

2. Product-Led Growth Analytics & Self-Serve Conversion Optimization Platform for K-12 SaaS

- Engineered a full-funnel product analytics framework that tracked 200+ in-app events across freemium users to identify activation bottlenecks and enable data-driven experiment design, improving free-to-paid conversion by 31%.
- Developed an automated competitive intelligence and pricing sensitivity dashboard that aggregated market signals from 50+ competitor sources and correlated them with churn patterns, supporting a repricing strategy that increased net revenue retention.

Tech Stack: Python, BigQuery, Amplitude, Statsig, Terraform, Stripe API, Fivetran, dbt, Tableau, FastAPI.

EDUCATION

M.S of Information Systems | Cleveland State University, USA

Aug 2023 – Dec 2025

- Monte Ahuja Scholarship for upto 6000\$

B. Tech in Aeronautical Engineering | BSA Crescent Institute of Science and Technology, India

Jun 2013 – Jun 2017

TECHNICAL SKILLS

- **CRM, GTM & Revenue Operations Platforms:** Salesforce, HubSpot, Apollo.io, 6sense, Clay, GTM Orchestration, Account Scoring, Marketo, Stripe, HubSpot API.
- **Workflow Automation, APIs & Data Quality:** n8n, FastAPI, REST APIs, Zapier, Great Expectations, Power Automate, Webhook Logging, ETL Automation, Data Validation, QA Frameworks.
- **AI, Machine Learning & Analytics:** Scikit-learn, PySpark, LangGraph, LangSmith, RAG, Behavioral Clustering, Predictive Lead Scoring, Funnel Analytics, Retention Analysis, Customer Segmentation, LTV Analysis, Forecasting Models, Experimentation & A/B Testing.
- **Programming, Query & Analytical Languages:** Python, SQL, T-SQL, VBA, DAX, SPSS.
- **Cloud, Data Engineering & Warehousing:** Snowflake, BigQuery, Amazon Redshift, AWS Glue, Amazon S3, dbt, Apache Kafka, Apache Airflow, SSIS, Informatica, Fivetran, Segment, Revenue Data Layer, Terraform.
- **Business Intelligence & Product Analytics:** Tableau, Looker, QlikView, Amazon QuickSight, Amplitude, Statsig.
- **Databases, Enterprise Systems & Collaboration Tools:** MySQL, SAP HANA, Git, GitHub, JIRA.

CERTIFICATION

- **DP-700 Microsoft Certified: Fabric Data Engineer Associate.**
